CAREER SUMMARY

A seasoned Cloud Data Analyst with a decade of success designing and implementing data strategies that drive business growth. Expert in leveraging modern cloud technologies (GCP, BigQuery) and BI tools (Power BI) to build automated ETL pipelines , develop impactful data models, and deliver actionable insights. A natural mentor passionate about developing analytics talent.

TECHNICAL SKILLS

Cloud & Data Platforms	Proficiency
Cloud: GCP, Azure, AWS	Proficient
Databases: BigQuery, SQL Server, SAP Hana	Expect
Admin: SAS Platform Administration	Proficient

Programming & Query Languages	Proficiency
SQL (T-SQL, PL/SQL, GoogleSQL)	Expect
DAX and Power Query	Proficient
SAS (incl. Macro Coding)	Proficient

BI & Data Visualization	Proficiency
Power BI	Expect
Looker Studio	Proficient
SAS Visual Analytics (VA)	Proficient

PROFESSIONAL EXPERIENCE

Cloud Data Analyst | Harambee youth employment accelerator | Jun 2024 - Present

- Leverage Google Cloud Platform (GCP) and BigQuery to perform large-scale data analysis and engineering.
- Build and automate cloud-based ETL pipelines to ensure efficient and reliable data flow for analytics.
- Design, develop, and maintain interactive Power BI dashboards to provide actionable insights for business stakeholders.

Senior Data Analyst | RedM Professional Services | Apr 2023 - Jun 2024

- Acted as the primary data advisor for senior business leaders, translating their strategic objectives into technical requirements for new data services and ensuring alignment throughout the project lifecycle.
- Developed comprehensive data strategies and guided business leaders on requirements for new data services.
- Oversaw data flow from various sources and contributed to the maintenance of data platforms and storage.
- Guided and mentored junior analysts, delegating tasks and fostering their skill development.

BI Data Analyst & Data Engineer | Nedbank | Jun 2019 - Mar 2023

- Utilized SQL and data visualization tools to uncover trends, identify patterns, and inform product strategy.
- Designed and built robust data pipelines to consolidate data from disparate systems, creating a single source of truth that powered a new product strategy.
- Automated ETL processes, enhancing efficiency and ensuring data accuracy through rigorous cleansing and validation.
- Prepared and built key regulatory reports for the Banking Association South Africa (BASA) on non-interest revenue.

Data Analyst | JD Group | Oct 2015 - Jun 2019

- Automated multiple reporting processes, significantly reducing manual effort and improving efficiency.
- Tracked and analyzed complex datasets to identify trends, patterns, and new process improvement opportunities.
- Collaborated with management to prioritize business needs and deliver data-driven insights.

Application Support | EOH | Sep 2014 - Sep 2015

- Provided technical system support, managed a ticketed query system, and delivered systems training to internal teams.
- Developed business reports based on stakeholder requirements and supported nightly system batch runs.

EDUCATION

- Bachelor of Commerce in Information and Technology Management (In Progress) | Mancosa | Jan 2024 - Dec 2026
- SAS Platform Administration | SAS Institute | Apr 2014
- Matriculation (with University Endorsement) | Makgoka High School | Dec 2006

PROFESSIONAL INTERESTS

- Actively engaged in learning **Python** to enhance data manipulation and automation capabilities.
- Following industry advancements in **Artificial Intelligence** and Machine Learning.
- Pursuing a deeper understanding of **Data Architecture** and scalable cloud infrastructure.
- Studying the **DAMA Body of Knowledge** (DMBoK) to master data governance best practices.
